SUMMARY

Second-year student at IIT Jodhpur exploring Computer Science and Electronics. I have great interest in programming and building new things. I specialize in full-stack development.

PROJECTS

Anti-Theft Security System *February 2025*

- Developed a password-based smart door lock system using ESP microcontroller, servo motor, buzzer, and camera.
- Implemented real-time alerts and intruder image capture upon incorrect password entry.
- Enhanced security by automating access control and detection of unauthorized entries.
- Designed for easy integration with IoT-based smart home solutions.

ProjMate - Full-Stack Team Collaboration Platform *December 2024*

- Built a full-stack collaboration tool with secure authentication and real-time team communication.
- Integrated OpenID Connect for login and Socket.io for live chat.
- Created dynamic dashboards for managing projects, team members, and resources.
- Integrated Google Generative AI API to support intelligent project assistance.
- Enhanced collaboration and project tracking for better efficiency.

Torrent & Media Transfer Discord Bot *January 2022*

- Created a Discord bot that automates torrent and YouTube downloads and uploads to Google Drive.
- Used WebTorrent for magnet link support and yt-dlp for YouTube media extraction.
- Integrated Google Drive API with OAuth2 for seamless file uploads and shareable links.
- Designed user interaction via command-based interface using Discord.js.
- Enabled fast, private access to cloud-hosted media through Discord.

FocusFlow— An AI-Powered Study Planner

- Built a full-stack web app that plans and tracks study sessions using AI recommendations.
- Integrated **Gemini API** for personalized feedback and productivity insights.
- Integrated **calendar scheduling,** smart reminders, and an interactive chat interface.
- Developed with **React**, **TailwindCSS**, **Express.js**, and **Google Calendar API**.

EDUCATION

Indian Institute of Technology, Jodhpur *July 2024 - May 2028 (Expected)*

B.Tech in Electrical Engineering

- **Relevant Coursework:** Calculus, Introduction to Electrical Engineering, Introduction to Computer Science, Linear Algebra and Differential Equations, Engineering Mechanics

Krishna Public School *April 2012 - May 2024*

- **AISSCE 2024:** Physics, Chemistry, Mathematics, English, Computer Science *Grade: 95.4%*
- **AISSCE 2022:** Science, Social Science, Mathematics, English, Hindi *Grade: 94.3%*

ACADEMIC ACHIEVEMENTS

- **JEE Advanced and Mains 2024**
  - **JEE Advanced:** Secured **AIR 6051** (CRL) out of 180,200 with 165 marks out of 360
  - **JEE Mains:** Secured **AIR 8946** (CRL) out of among 1.4 million candidates with 212 marks out of 300 and 99.446 %ile

TECHNICAL SKILLS

Programming Languages: JavaScript (Node.js), Python, C, C++
Web & Backend: Express.js, EJS, HTML/CSS, Socket.io
Framework: React, Next.js, Express, TailwindCSS
Databases: SQLite, MySQL
APIs/Tools: Google Drive API, OAuth2, OpenID Connect, Discord.js
Others: Git, GitHub, VS Code, WebTorrent, yt-dlp
